Robert Herring
Web Developer

My name is Robert Herring. I first used a computer in 1988, but I truly got serious about them when my dad brought home our first one in 1997. In September of '97 I built my first of many fantastic websites. From there, I got into design. It was the marriage of design and code where I found my calling. The ability to code was fun, but making my projects look great and stand out in the crowd is the most rewarding.

JOB EXPERIENCE

FULL STACK DEVELOPER: Disciple Christian MC, 2009 - 2021

In 2009, I designed, developed, and maintained Disciple's first website. I helped create the look and feel of non-profit both online and in real life. I helped develop products and apparel to be sold both online and at in-person events. In October of 2016, I started designing and developing their current e-commerce platform that launched on January 1, 2017. In March of 2021, I designed and developed a completely new (anti)social media platform from scratch using Laravel, Vue JS, Node, and CSS3 for the Christian organization so they can have a secure location online for communication. Since 2009, I've also helped with video and motion graphics production.

FULL STACK DESIGNER: DIESEL LAPTOPS in IRMO, 2018 - 2021

Aided in the design and development of each of the three corporate websites, product packaging, conference booths, materials for conferences and sales reps, and produced and edited corporate videos.

MARKETING SPECIALIST: IMCS in IRMO, 2017 - 2018

Maintained the corporate website, produced and edited corporate videos, designed product packaging, conference booths, and print material for conferences and sales reps.

EDUCATION

FULL SAIL UNIVERSITY: BACHELOR of SCIENCE in DIGITAL ARTS & DESIGN in 2008

The **Digital Arts & Design** degree provided a complete design education, with industry-specific courses that teach you how to communicate ideas and stories through different media, including **video**, **print**, **motion graphics**, and the **web**.

MIDLANDS TECHNICAL COLLEGE: ASSOCIATES of ARTS in 2003

The **Commercial Graphics** program at Midlands Technical College is designed to provide qualified support technicians for the printing industry.

Robert Herring
Web Developer

Here you'll find a few of the most recent pieces of my portfolio along with a short description of each and my involvement on the project.

To view more of the projects I've worked on, please go to my website: http://**www.Robert-Herring.com**

DIESEL LAPTOPS:
E-COMMERCE PLATFORM, 2019

Diesel Laptops provides diagnostic equipment for the truck, construction, automotive, ag, and off-highway markets.

I helped design and develop this entire site using the latest methods in jQuery, HTML5, CSS3, PHP, and LIQUID for Shopify.

FRONTLINE ARSENAL:
E-COMMERCE PLATFORM, 2019

Diesel Laptops makes it their mission to provide high quality technician training for the diesel repair industries!

I helped design and develop this entire site using the latest methods in jQuery, HTML5, CSS3, PHP, and LIQUID for Shopify.

LEXINGTON REFERRAL GROUP:
E-COMMERCE PLATFORM, 2019

Everything Diesel Laptops offers on land, Marine Diagnostic Tools will offer on water.

I helped design and develop this entire site using the latest methods in jQuery, HTML5, CSS3, PHP, and LIQUID for Shopify.
